***Election/Restriction***

The examiner required restriction of the invention under 35 U.S.C. § 121 to one of the following Groups:

- I. Claims 1-6 and 23-25, drawn to method of hybridization (class 435, subclass 6).
- II. Claims 7-22 and 26-30, drawn to apparatus (class 128, subclass 922).

Applicant hereby elects Group II, with traverse. In support of the restriction, the examiner stated "the method of hybridization of Group I can be practiced by the apparatus of Group II or can be practiced manually by hand."

The examiner's attention is kindly drawn to claim 1, which recites, "executing an *electronic* hybridization assay". The examiner has not stated in the reasoning for the restriction requirement how an *electronic* hybridization assay is executed by hand. As a result thereof, Applicant submits that a complete, *prima facie* showing of a need for a restriction requirement was not set forth. The restriction requirement should therefore be withdrawn.
